

# Consumer Electronics Design

Indesign's engineers have broad experience in the design of consumer electronics. Indesign was founded by a team of engineers from Lucent Bell Laboratories that was responsible for the design of AT&T Consumer Products. Members of our engineering team designed a wide variety of AT&T consumer communication devices including: telephones, cordless phones, answering systems, security systems, and video phones.

Since forming Indesign, our engineering team has worked on numerous other products in the consumer electronics space including set-top boxes, multi-media players, personal medical and healthcare devices, GPS products, communication products, PC peripherals, and a host of other consumer devices in many different vertical markets. We are design experts at cost optimized, high-volume, consumer electronic products.

Indesign engineers can help you with a full turnkey design or with any portion of your project where you might need assistance. We work with many technology partners to provide the technical expertise you need for your next project. Our engineers can help you incorporate industry standard technology solutions like USB or Bluetooth, for example, or we can help you develop a custom proprietary solution. Indesign is a member of the Consumer Electronics Association.

## PROVEN TECHNOLOGY EXPERIENCE

- USB
- ZigBee/802.15.4
- Bluetooth
- WiFi/802.11
- Cellular MODEMS
- GPS
- Proprietary RF
- WinCE
- Linux
- Audio
- Video
- DSP

## CONSUMER PRODUCT EXPERIENCE

- Audio
- Set-top Box
- Digital Imaging/Video
- Healthcare
- Home Automation
- Medical
- Mobile Electronics
- Multimedia
- Personal Electronics
- Computer Peripherals
- Small Office/Home Office
- Telephony/VoIP
- Location Tracking Devices
- Wireless Communications

## About Indesign:

Indesign is a multi-discipline engineering design firm that provides full turnkey electronic product development to allow clients to get their new product ideas into the market quickly. Indesign offers complete product development capabilities, starting with a product concept and finishing with a ready-to-manufacture design. Indesign has an ISO certified product development process and a proven track record for on-time, on-budget, high quality product realization.

Indesign provides specific design engineering services and expertise in electrical design, RF/wireless design, embedded software design, and mechanical design. Indesign also provides engineering services and expertise in a variety of other technical areas including systems engineering, human factors, project management and product validation testing. Indesign engineers can complement a client's in-house design engineering staff, working in partnership with clients on joint development projects.
